Governance

ENVIRONMENTAL

We offset our environmental impact by reconditioning equipment. We also upgrade equipment to current industry best practices for processing fuels with the most efficiency and least amount of waste. Our commitment drives our product development, our processes and most of all, our performance of environmental responsibility.

SOCIAL

Our social impact starts with our commitment to our people. We value our relations, health and safety and general wellbeing for each individual. We are also engaged and committed to charitable initiatives to impact our communities.

GOVERNANCE

We have a board of directors to better ensure compliance and checks and balances. Additional company investments have been made such as in-house human resources and legal support to safeguard the trust for our company and customers.

Reducing Waste & Pollution

Reuse of Steel

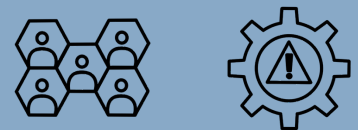

Recondition Equipment

Employee Relations

Health & Safety

ARC ENERGY

Optimizing Earth's Resources Through Responsible Equipment Solutions

HOW ARE WE GETTING BETTER?

We believe the continued integration of ESG commitments and practices will further strengthen our business for the long-term. ESG is a continuous process of aligning our operations and controls with our Mission as a company.
